 - *Program Idle Speed*
 - *Program Variant Configuration*
 - Immobilizer – Additional Special Functions:
 - *Remote Central Locking Fob Key Initialize, Erase & Program*
 - *Reset Engine ECU*
 - *Program Immobiliser Function*

The Reset Engine ECU function provides the ability to reset an ECU so that it can be removed from an operational vehicle for replacement or to be fitted into another vehicle.

The Program Immobiliser function allows a previously reset engine or replacement (Note: must be programmed, not “blank”) ECU to be linked into a vehicle immobiliser system so that the engine will start.

The Program Variant Configuration & Program CAN configuration allows a replacement ECU to be set up to match the specification of the vehicle it is fitted to.

New Remote Central Locking Fob Key Initialize, Erase & Program tests allow existing Fob keys to be erased and new ones programmed to the vehicle. When used in conjunction with the existing erase and program transponder keys function, a complete replacement key & remote can now be programmed to the vehicle.

Please note: The above functions may require access to the vehicle security code to complete the procedure.
